

# How to run streamlit App

(First change the path of model in apps python script that is in apps.py)

**Step 1 :** Create a new folder and add the downloaded zip folder in that and extract it

**Step 2 : Open Command Prompt**

`cd (path to folder)`

**Step 3 : Create a Virtual Environment**

`python -m venv venv`

**Step 4: Activate the Virtual Environment**

`venv\Scripts\activate`

**Step 5 : Install Libraries**

`pip install streamlit torch torchaudio speechbrain librosa soundfile numpy`

**Step 6 : Path to folder with apps.py file**

`cd (path)`

**Step 7 : Run Streamlit App**

`streamlit run apps.py`

(Here our app script is in app.py )
